

## Position Summary

Title	Assembly Technician
Team	R&D
Location	Montreal
Employment Type	Full-Time

## Job Description

Introspect seeks a full-time, experienced and dynamic electronics technician to join our outstanding R&D team. He or she will be a key team member responsible for the production of Introspect's high quality equipment. They will be required to perform all functions in support of the manufacturing and assembly and the components thereof. The functions may include, and are not limited to: assembly, inventory, quality control and material handling.

The ideal candidate is a driven, self-motivated, and highly cooperative top performer who thrives in a fluid and open development environment. The ideal candidate also possesses characters of good judgment, communication, passion, and eagerness to learn and adapt, and he/she is comfortable integrating into a high-pace and innovative development paradigm.

## Responsibilities

- Perform complex electrical assembly of all products and sub-assemblies on all product types to ensure product meets customer specifications;
- Safely package parts for internal and external delivery including managing inventory through inventory tracking systems;
- Perform material picks, inventory transactions, part sorting, counting, material deliveries and put away transactions;
- PCB assembly preparation and kitting;
- PCB component update and modification for RF products;
- Interact closely with hardware and software team in carrying out various test and verification activities;
- Test equipment calibration execution

## Qualifications

- Electronics Technologist diploma preferred
- 1-2 years of experience within a hardware product development environment
- Excellent PCB component rework skills — soldering of small SMD components (0201 size)
- Basic technical aptitude including but not limited to: computers, assembly, fabrication and general manufacturing principles
